53.973MWh

YEARLY COST BEFORE SOLAR
\$14,900.00

YEARLY COST AFTER SOLAR
\$4,250.00

Lilydale Service Group

Lilydale Service center is owned and operated by Martin Phillips, with 20 years of experience as a former owner of the award-winning Waverley Service Centre.

Martin was looking for a smarter and more sustainable option to reduce his current power bill. After discussing his options with the Cyanergy team, Martin made an investment of 33k in a 38kW solar system. This system has an estimated annual production of 53.973MWh, with a payback period of 32 months.

Before investing in solar, the service group's power cost was 14K per annum. After the installation of the solar system, the power cost has been reduced to 4K per annum.

The Lilydale Service Group is now experiencing the following benefits:

1. Reduced power costs:

By investing in a solar system, the Lilydale Service Group has been able to reduce its power costs from 14K to 4K.

2. Increased sustainability:

The Lilydale Service Group is now able to do its part in reducing its carbon footprint and promoting sustainability.

3. Financial savings:

Lilydale Service Group has seen significant financial savings since investing in the solar system.

The Lilydale Service Group's solar installation is an example of how investing in renewable energy can be beneficial to businesses.

Not only does the installation provide a cost-effective way to reduce energy costs, but it also helps to reduce the group's carbon footprint. Investing in renewable energy is a win-win for all involved.

The Lilydale Service Group's solar installation is a success story that other businesses should take note of. Investing in renewable energy is a great way to reduce operational costs and do your part for the environment.
